

NOTICE OF EXTENSION OF THE PUBLIC COMMENT PERIOD THROUGH JANUARY 30, 2015 on NASA'S Proposed Plan Relating to Groundwater Cleanup at JPL

NASA is extending the public comment period for NASA's Proposed Plan to January 30, 2015. (The public comment period originally ended December 3, 2014.) NASA's Proposed Plan outlines the Agency's Preferred Alternative for groundwater cleanup for the Jet Propulsion Laboratory (JPL) and areas adjacent to it. This Plan is available for public review and comment at <http://go.nasa.gov/ZNW0v>. The PUBLIC COMMENT PERIOD will end on January 30, 2015.

The NASA Preferred Alternative, described and analyzed in the Proposed Plan, is to continue operating three existing treatment systems on and near JPL, continue groundwater monitoring, and add various institutional controls (e.g., non-engineering measures that are administrative or legal in nature) to ensure safe groundwater use near the JPL site, and continuing NASA's routine groundwater monitoring program.
